

XTS Custom Pedals
Precision Multi-Drive

The Precision Mulit-Drive is a great sounding, versatile overdrive housed in a rugged, road-ready package. Designed to react and feel like a real tube amp, the Multi-Drive reacts to your guitar volume knob by going from clean to classic amp saturation with no other control adjustment.

The Precision Multi-Drive has more gain available than many overdrives, but maintains touch sensitivity at all settings. At low Gain settings, the Multi-Drive is also a superior clean boost. Regardless of your application, the Multi-Drive gives you a flexibile voice that cuts through the mix!

Multi-Drive Controls
Multiple Voicings / Multiple Tones

Low-end contour control. Slim the bass response of an archtop, make your bridge pickup Fat or go Fatter for the fullest bass response possible.

Dynamics control. Easily fine tune your pedals response and feel to suit your needs. Punch for an open response, Edge for slower attack and Soft for an easy to play feel.
